SUMMARY

An aspiring Software Developer with a focus on frontend languages. While still newer to the coding atmosphere, I have a drive to constantly learn and improve upon my own knowledge of each language, and will translate that same attitude to the work space.

EXPERIENCE & PROJECTS

BurnWhisper — *JavaScript Developer*

Nov 2022 - Dec 2022

Worked on models and routes in order for users to create profiles, make posts, and post comments. Also worked on the JavaScript that allowed for the application to run and save data in MySQL.

Tasty Tunage — *API Tester and CSS Styler*

Sep 2022 - Oct 2022

Tested different music APIs in order to get the application to properly search sample tracks. Used JavaScript to properly pull data from Spotify and GeniusLyrics API. Worked on CSS for stylizing the application

Weather Forecast — *JavaScript Developer*

Oct 2022

Used JavaScript to properly pull data on the weather using server-side APIs. Allows the user to find weather data on any city they search, and then saves their search history.

SKILLS

[JavaScript](#) [Node.js](#) [React](#)

[HTML](#) [CSS](#) [MySQL](#)
