SUMMARY

Nicholas has hands-on experience in software development and working on team projects. Has a passion for space technology and seeking an internship. Skilled in Javascript and the MERN stack, with experience in developing web applications and database management. Proven ability to learn quickly, work in a fast-paced environment, and contribute to a team effort. Excited to apply technical and problem-solving skills.

Experience & Projects

Frogge E-Commerce — Backend Developer

Jan 2023 - Present

An e-commerce website that uses the MERN stack to build its front-end and back-end. Helped develop and manage HTTP requests as well as responses, routing, middleware, and database integration more efficiently.

BurnWhisper — Javascript Developer

Nov 2022 - Dec 2022

An online web forum where users can create profiles and make posts. Worked on the Javascript that allowed the seeding of data and for it to be stored. Helped add authentication processes as well.

Tasty Tunage — API Tester and CSS Styler

Sep 2022 - Oct 2022

Tested different music APIs in order to get the application to properly search sample tracks. Used JavaScript to properly pull data from Spotify and GeniusLyrics API. Worked on CSS for stylizing the application

SKILLS

JavaScript Node.js
React.js Express.js
HTML CSS MySQL
MongoDB Github

EDUCATION

Software Developing

UC, Los Angeles - edX

Aug 2022 - Present

B.S. in Education

UC, Riverside

Sep 2020 - Dec 2022

A.S in Math and Science

Moreno Valley College

Aug 2014 - Jun 2018
